IQAC Report

The IQAC has been an institutional body that has been increasingly contributing to the quality upgrading of the college's different core and peripheral activities. The function of IQAC has been vital in the institution's goal of providing excellent education to students, as its fundamental priority has been creating techniques and procedures to assure rising competency in academic, administrative, and financial activities of the institution.

IQAC prepares the academic calendar in conjunction with the department heads to ensure the smooth operation of the college. Teachers are expected to create and submit a teaching plan to the IQAC well in advance.

At the start of each academic year, the college's IQAC develops a strategy for sponsoring conferences, seminars, and workshops, as well as a Faculty Development Program.

Mentors are recommended by IQAC to identify pupils who are slow and advanced learners. Slow learners are offered remedial classes, whereas advanced students are given project work. Certificate courses are administered under the supervision of the college's IQAC.

The IQAC collects and analyzes feedback from stakeholders such as students, faculty members, alumni, and employers about the curriculum, academic and physical infrastructure of the college, and the quality of teaching in the institutions.

Formative and summative assessments are used to calculate the learning outcome. The IQAC meeting discusses the feedback analysis, which is then forwarded to the Governing Council.

Teachers are informed of the students' feedback reports, and suggestions are made accordingly. Teachers are encouraged to conduct research in order to improve their teaching quality.

Under IQAC 41 workshops were conducted in research, IPR and entrepreneurship. Faculty members and students attended the workshop.

In the academic year 2021-22 and 2022-23, the college IQAC conducted Academic and Administrative. IQAC completed Green Audit, Gender Audit, and Energy Audit during the academic year 2021-22 and 2022-23. The IQAC has proposed that a skill development program be conducted for the benefit of faculty members.

The college president referred this to the college development committee. It was communicated to the governing council following the discussion in the college development committee. The governing council deliberated on it and advised the college principal to initiate a skill development program for faculty and administrative staff.
